GREENISITS

OSLO REGION

Green Visits is a professional service which organizes technical visits in the Oslo region for delegations in search of knowledge, technology and solutions linked to green innovation.

Focus areas:

Green transport

Renewable energy

Green buildings

Waste in the circular economy

WP 5 “Political & strategic capacity”

- Strategies at city / regions level also suffering from lack of innovation-based transnational cooperation
- Two bodies:
 - Political Board – surveying WP works (directors/CEO level)
 - Policy Advisory Group – carrying day-by-day-works (civil servants level)both compulsory to public project partners (regions / cities), but open to further partners interested
- Target / Output: set of “Policy Recommendations”, added by “toolbox” on how to internationalise regional/city innovation strategies (or similar) – 1st draft adopted end 2018
